APPROVAL OF STATE ENGINEER				
following limitations and conditions: This permit is issued subject to existing rights. It is understoof that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NR\$ 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.  This Permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.  The total combined duty of water under this permit and Permit 31031, Certificate 10923 shall not exceed 5.256 million gallons annually.  The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal, and local agencies.  This permit is issued under the provisions of NRS 534.120(2) as a preferred use. The total combined diversion rate of this permit and Permit 31031, Certificate 10923 shall not exceed 1.0 cubic feet per second.  The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0.  Cubic feet per second. but not to exceed 2.506 million gallons annually.
